Introducing *Capri Dairy Management*, a revolutionary new system to ease the burden of operating and managing your farm.

This revolutionary new system, developed by Capricorn Incorporated, is aimed at Australian Dairy Goat Farmers. Utilising the latest technology available to the marketplace, *Capri* will enable you to access any information about your farm.

From individual animals to entire herds, from the smallest piece of equipment to the largest field, *Capri* gives you the power and flexibility to inspect anything you could think of.

Combined with *Capri Farm Mate*, a mobile Pocket PC system, data can be viewed, entered and updated on the spot, in the field, without the need to re-enter it later on. All information that is altered on *Capri Mate* updates the database on the main system with the click of a button.
The features available in Capri were designed with an emphasis on easy use. We know that you have better things to do than learn how to use a new computer system, so we make sure that any work that needs to be done can be carried out easily and efficiently.

Need to check the medical history of a particular animal? No problem. Not sure which goat showed signs of illness? Easily solved. Unsure whether you have enough feed stored to last until you re-stock? Don’t worry. Any information that you may ever need to access, is right at your fingertips.

**Key Features:**

- Farm Information Management
- Herd Information Management
- Animal Information Management
- Feed Planning and Cost Management
- Development of Satisfactory Breeding Objectives and Selection Criteria
- Identification and Recording of Pedigrees
- A Robust and Repeatable Program of Herd Recording
- A System to provide Breeders with Breeding Values and store Databases
- Advanced Searching Facilities
- Secure Access Control

**Minimum Requirements:**

- WINDOWS® 2000
- 64 MB RAM (128 MB recommended)
- 200 MB free hard disk space

**Pricing:**

Standard – approximately $500

Extended – Additional reporting facilities with extra pedigree support approximately $700
